- Ruler /
- Tape measure
- Pins

HOW TO MAKE A PUPPY TUGGY TOY

Written by Papia Rowe

Making a puppy tuggy is really easy – you don't even need to know how to use sewing machine as there is no sewing involved at all!

STEP 1:

CUT YOUR FABRICS

For this tuggy, I cut three strips of polar fleece 3 inches wide and 24 inches long.

STEP 2:

LAYER YOUR FABRIC

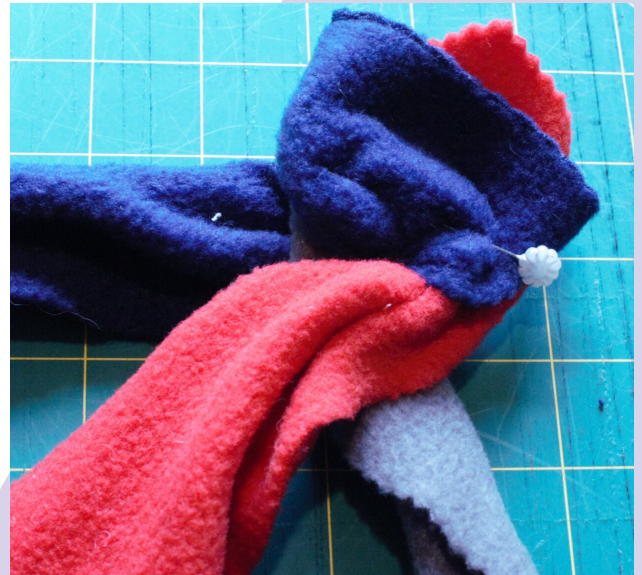

Layer your three layers of fabric on top of each other and then secure them with a pin at one end.

STEP 3:

START PLEATING THE STRIPS TOGETHER

Hold the three layers of fabric, in your hands with the pin at the top. I started by taking the red strip on the far right and passing it on top of the grey strip. The red strip is now in the middle and the grey strip is on the far right.

Then take the blue strip on the left and pass it on top of the red strip. Then keep bringing the strip from the outside over to the middle, swapping from left to right and always tightening as you go.

Stop pleating while you have about 5 inches of fabric left and secure with a pin.

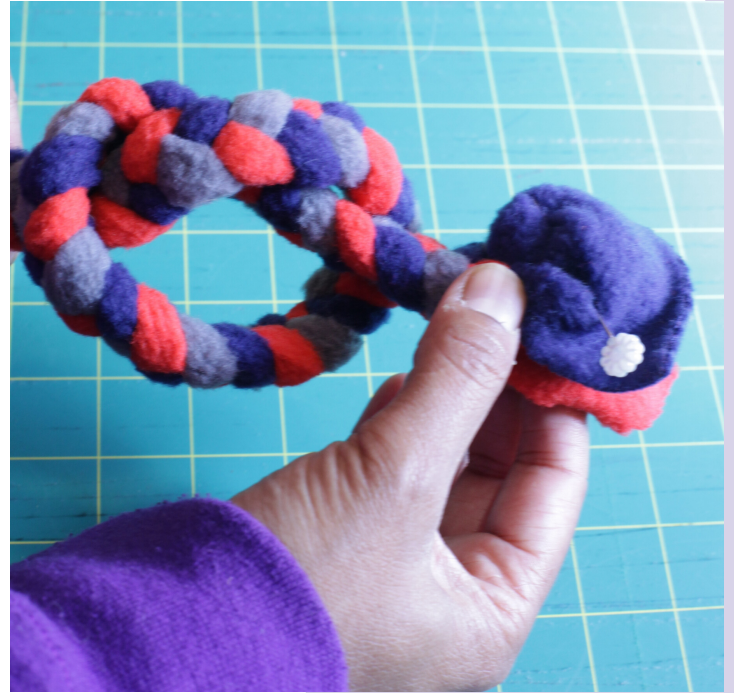

STEP 4:

SECURE THE ENDS

To secure each end of the tuggy, you need to pass one end of the fabric back around itself to create a loose knot. Then push the knot to the end of the length and tighten when you reach it.

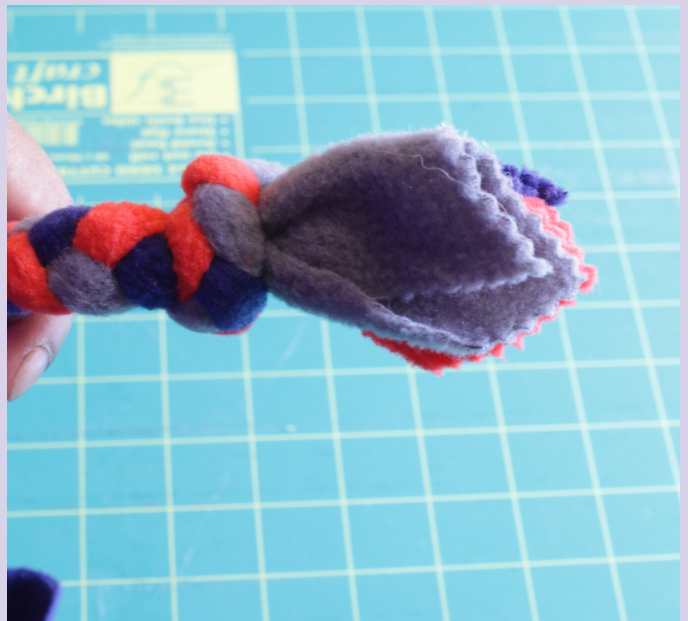

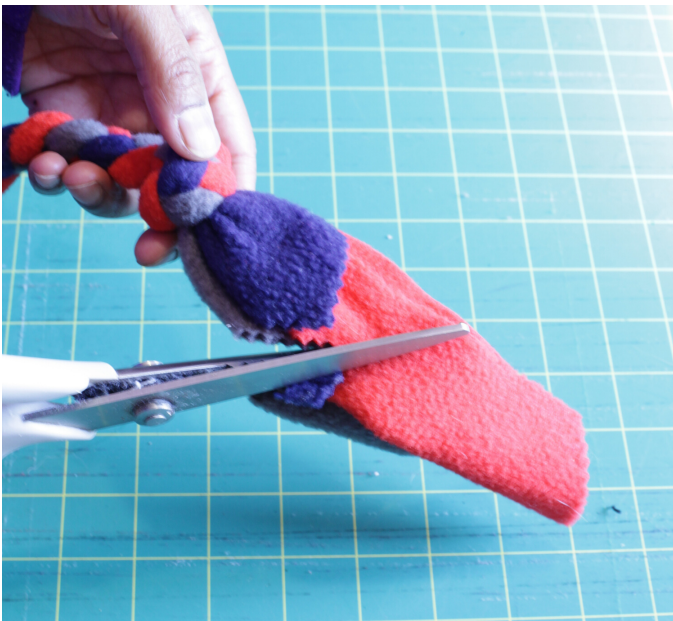

Repeat with the other end

STEP 5:

TIDY THE ENDS OF THE PUPPY TUGGY

Take your scissors and trim the ends of your fabric that just out after your knots. And you are finished! Hurrah! It's now time to try it out.
